## GLOSSARY

**Alpha (3y):** A measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

**P/B Ratio:** represents the ratio of the current closing price of the share to the latest quarter's book value per share.

**P/E Ratio - Forward:** The forward price-to-earnings ratio is used to assess a company's valuation. To compute this ratio, the latest closing price is divided by the company's consensus mean EPS estimate for the next unreported fiscal year. The ratio represents a weighted harmonic mean of the forward price-to-earnings ratios of its holdings with negative values being excluded from the calculation.

**Standard Deviation (3y):** Standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

**Beta (3y):** Beta measures the funds sensitivity to market movements beta greater than 1 is more volatile than the market beta less than 1 is less volatile than the market.

**R-Squared (3y):** R-Squared reflects the percentage of a funds movements that are explained by movements in its benchmark, showing the degree of correlation between the fund and benchmark. This figure is helpful in assessing how likely it is that beta is statistically significant.

**Active Share:** measures the percentage of fund holdings that is different from the benchmark holdings at a point in time. It is calculated by taking the sum of the absolute value of the differences of the weight of each holding in a fund's portfolio versus the weight of each holding in a benchmark index and dividing by two. A fund that has no holdings in common with the benchmark will have an Active Share of 100%, and a fund that has exactly the same holdings as the benchmark considered will have an Active Share of 0%. Active Share levels can vary depending on the underlying benchmark and investment universe. Funds with more concentrated benchmarks or smaller investment universes will typically have lower Active Share. Active Share is not indicative of future performance or a measure of expected return deviation from the benchmark.

**Number of Holdings:** The number of holdings in the fund excluding cash positions and derivatives such as futures and currency forwards.

## IMPORTANT INFORMATION:

**Source:** BlackRock, unless otherwise noted.

**You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional. The prospectus should be read carefully before investing. Investing involves risks including possible loss of principal.**

% of net assets represents the Fund's exposure based on the economic value of securities and is adjusted for futures, options, swaps, and convertible bonds.

**Key Risks:** The fund is actively managed and its characteristics will vary. Stock values fluctuate in price so the value of your investment can go down depending on market conditions. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. Investing in small- and mid-cap companies may entail greater risk than large-cap companies, due to shorter operating histories, less seasoned management or lower trading volumes.

**Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.**

The Russell 1000 Growth Index measures performance of companies in the Russell 1000 Index with greater-than-average growth orientation.
