

Fact Sheet as of March 31, 2026

Institutional: BACIX | Investor A: BACAX | Investor C: BACCX

INVESTMENT APPROACH

Invests primarily in securities of global energy companies and companies in associated businesses, in all capitalization ranges.

FUND HIGHLIGHTS

1. **High Growth Potential Through Energy Equities**
2. **A Global, Multi-Cap Approach**
3. **Hedge Your Portfolio from Rising Energy Costs**

CALENDAR YEAR PERFORMANCE (%)

	2021	2022	2023	2024	2025
Share Class	43.48	43.70	2.96	4.23	11.04
Benchmark	40.09	46.01	2.54	2.70	13.32
Morningstar Category Avg.	44.81	45.02	1.61	1.17	11.96

ANNUALIZED PERFORMANCE (%)

	1y	3y	5y	10y
Share Class	38.87	18.78	22.83	10.35
Benchmark	40.88	19.14	22.36	10.50
Morningstar Category Avg.	43.00	17.09	19.88	7.76

Performance data shown represents past performance which is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. Refer to blackrock.com for current month-end performance. Institutional shares have limited availability and may be purchased at various minimums. Please see the fund prospectus for more details.

MORNINGSTAR RANKINGS

	1y	3y	5y	10y
Morningstar Ranking	44/72	34/67	25/62	24/57
Quartile Rank	2	2	2	2

Rankings based on total return excluding sales charges, independently calculated and not combined to create an overall ranking. For periods not shown, Morningstar does not provide rankings based on synthetic performance.

RATINGS

Overall Morningstar Rating for Energy Opportunities Fund, as of 03/31/2026 rated against 67 Equity Energy Funds based on risk adjusted total return.**

KEY FACTS**Asset Class** : Equity**Benchmark** : MSCI World Energy Index (USD) (Net)**Fund Launch Date** : 02/16/2005**Share Class Launch Date** : 02/15/2005**Morningstar Category** : Equity Energy**CUSIP** : 091937284**Open to New Investors** : Yes**Size of Fund (Millions)** : \$397.20**Size of Class (Millions)** : \$127.45**Max Offer Price** : \$19.55**ANNUAL EXPENSES****Gross Expense Ratio** : 1.04%**Net Expense Ratio** : 0.92%

The Net Expense Ratio excluding Investment Related Expenses is 0.92%. Investment Related Expenses include acquired fund fees of 0.00%, and interest expense (cost of borrowing securities to seek to enhance return or reduce risk) of 0.00%, and certain other expenses, if applicable. Expenses stated as of the fund's most recent prospectus. The difference between gross and net expense ratios are due to contractual and/or voluntary waivers, if applicable. This share class has a contractual waiver with an end date of 06/30/2027 terminable upon 90 days' notice. BlackRock may agree to voluntarily waive certain fees and expenses, which the adviser may discontinue at any time without notice.

GLOSSARY

Alpha (3y): A measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

P/B Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

P/E Ratio - Forward: The forward price-to-earnings ratio is used to assess a company's valuation. To compute this ratio, the latest closing price is divided by the company's consensus mean EPS estimate for the next unreported fiscal year. The ratio represents a weighted harmonic mean of the forward price-to-earnings ratios of its holdings with negative values being excluded from the calculation.

Standard Deviation (3y): Standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

Beta (3y): Beta measures the funds sensitivity to market movements beta greater than 1 is more volatile than the market beta less than 1 is less volatile than the market.

R-Squared (3y): R-Squared reflects the percentage of a funds movements that are explained by movements in its benchmark, showing the degree of correlation between the fund and benchmark. This figure is helpful in assessing how likely it is that beta is statistically significant.

Active Share: measures the percentage of fund holdings that is different from the benchmark holdings at a point in time. It is calculated by taking the sum of the absolute value of the differences of the weight of each holding in a fund's portfolio versus the weight of each holding in a benchmark index and dividing by two. A fund that has no holdings in common with the benchmark will have an Active Share of 100%, and a fund that has exactly the same holdings as the benchmark considered will have an Active Share of 0%. Active Share levels can vary depending on the underlying benchmark and investment universe. Funds with more concentrated benchmarks or smaller investment universes will typically have lower Active Share. Active Share is not indicative of future performance or a measure of expected return deviation from the benchmark.

Number of Holdings: The number of holdings in the fund excluding cash positions and derivatives such as futures and currency forwards.

IMPORTANT INFORMATION:

Source: BlackRock, unless otherwise noted.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional. The prospectus should be read carefully before investing. Investing involves risks including possible loss of principal.

% of net assets represents the Fund's exposure based on the economic value of securities and is adjusted for futures, options, swaps, and convertible bonds.

**Energy Opportunities Fund received a Morningstar Rating of 4 stars for the 3-year period, 4 stars for the 5-year period and 4 stars for the 10-year period, rated against 67, 62 and 57 Equity Energy Funds, respectively. Performance results represent past performance and are no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Morningstar Ratings are for the share classes cited only; other classes may have different ratings.

Key Risks: The fund is actively managed and its characteristics will vary. Stock and bond values fluctuate in price so the value of your investment can go down depending on market conditions. International investing involves special risks including, but not limited to currency fluctuations, illiquidity and volatility. These risks may be heightened for investments in emerging markets. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. Investing in small- and mid-cap companies may entail greater risk than large-cap companies, due to shorter operating histories, less seasoned management or lower trading volumes. Investments in natural resources industries can be affected by variations in commodities markets, weather, disease, embargoes, political and economic developments, taxes and other government regulations.

Index returns are for illustrative purposes only. Returns for net indices generally assume the reinvestment of dividends after the deduction of the maximum withholding tax in each country applicable to non-residents of the country as determined by the index provider. Such indices use withholding tax rates that are often at a higher rate than the rates to which the Fund is subject in each country, including for countries where the Fund is not subject to withholding taxes. When this is the case, index performance will be lower than if the index used the Fund's applicable withholding tax rates, if any. Index performance returns do not reflect any management fees or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

The MSCI World Energy Index is designed to capture the large and mid-cap segments across developed markets countries.
