Performance data quoted represents past performance and is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. Refer to [www.blackrock.com](http://www.blackrock.com) for current month-end performance. Investment returns reflect total fund operating expenses, net of all fees, waivers, and/or expense reimbursements. Index performance is shown for illustrative purposes only. It is not possible to invest directly in an unmanaged index.

The share classes have different sales charges, fees and other features. Returns with sales charge reflect the deduction of current maximum initial sales charge of 4% for Unit Class A and applicable contingent deferred sales charges (CDSC) for Unit Class C. The maximum CDSC of 1% for Unit Class C is reduced to 0% after 1 year.

#### CREDIT QUALITY (% OF MARKET VALUE)

AAA Rated	AA rated	A Rated	BBB Rated	BB Rated	B Rated	CCC and below	Not Rated	Cash	Derivatives	Other
29.4	6.1	9.2	10.3	9.9	7.6	3.7	7.1	16.0	-0.4	1.0

The fund itself has not been rated by an independent rating agency. Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies when all three agencies rate a security, the lower of the two ratings if only two agencies rate a security and one rating if that is all that is provided. Unrated securities do not necessarily indicate low quality. Below-investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

\* The underlying investments are 100% invested in their respective mutual fund option.

**BlackRock CollegeAdvantage 529 Plan** is offered to residents of all states. However, you should note that (i) depending on the laws of the state where you or your beneficiary live or pay state income taxes, favorable state tax treatment or other benefits offered by the applicable state for investing in qualified tuition programs may be available only for investments in such state's qualified tuition program, (ii) any state-based benefit offered with respect to a particular qualified tuition program should be one of many appropriately weighted factors to consider in making an investment decision and (iii) you should consult with your financial, tax or other advisers to learn more about how state tax and state-based benefits (such as financial aid, scholarship funds and protection from creditors that are only available for investments in such state's qualified tuition program) would apply to your specific circumstances and you may wish to contact your home state and your beneficiary's home state, or any other qualified tuition program, to learn more about the features, benefits and limitations of the applicable state's qualified tuition program.

**Important Risks:** The fund is actively managed and its characteristics will vary. Holdings shown should not be deemed as a recommendation to buy or sell securities. Fund of funds is subject to the risks associated with the underlying BlackRock funds in which it invests. Stock and bond values fluctuate in price so the value of your investment can go down depending on market conditions. Non-investment-grade debt securities (high-yield, junk bonds) may be subject to greater market fluctuations, risk of default or loss of income. Investing in small-cap companies may entail greater risk than large-cap companies, due to shorter operating histories, less seasoned management or lower trading volumes. Investing in mid-cap companies may entail greater risk than large-cap companies, due to shorter operating histories, less seasoned management or lower trading volumes. Asset allocation strategies do not assure profit and do not protect against loss. Non-diversification of investments means that more assets are potentially invested in fewer securities than if investments were diversified, so risk is increased because each investment has a greater effect on performance. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. **The target enrollment time frame in the name of the fund is the approximate date when an investor plans to start withdrawing money. The principal value of the fund is not guaranteed at any time, including at the target date.**

An investor should consider the investment objectives, risks, charges and expenses associated with municipal fund securities before investing. More information about municipal fund securities is available in the issuer's program description. You may obtain a program description or current month-end performance for any investment option by visiting [www.blackrock.com/collegeadvantage](http://www.blackrock.com/collegeadvantage), calling 866-529-8582 or contacting your financial adviser. The program description should be read carefully before investing.

Any investment in a BlackRock CollegeAdvantage mutual fund-based investment option is not insured or guaranteed by the FDIC or any other government agency or other party, including the custodian/state of Ohio, the Tuition Trust, BlackRock or any of the mutual fund firms under contract with the Ohio Tuition Trust Authority. Investing involves risks including possible loss of principal.

1 Performance data reflects fees, expenses and annual asset-based fees for each underlying fund. Because the 529 Option has higher expense ratios than the underlying funds, it will have lower performance than the underlying funds. However, the underlying funds do not offer the same tax advantages as the 529 Option. Performance differences also are caused by differences in the trade dates of Portfolio purchases. When you invest money in a 529 Option, you receive Program Units as of the trade date. The trade date for the purchase of underlying fund shares typically will be one business day after the trade date for your investment. 2 Barclays U.S. Universal Bond Index comprises the global bond market. 3 BofA Merrill Lynch 3-Month U.S. Treasury Bill Index tracks U.S. government securities maturing in 90 days. 4 **Weighted Average Life** is the average number of years for which each dollar of unpaid principal on a loan or mortgage remains outstanding. **Duration** measures sensitivity of a fixed-income investment price to a change in interest rates. **Effective Duration** considers that expected cash flows will fluctuate as interest rates change.
