

Fact Sheet as of March 31, 2026

Class K: PBAKX | Institutional: PBAIX | Investor A: PCBAX | Investor C: BRBCX | Service: PCBSX

INVESTMENT APPROACH

The BlackRock Tactical Opportunities Fund is a macro strategy that tactically allocates across global markets and asset classes and has achieved lowly correlated, stable growth.

FUND HIGHLIGHTS

1. A liquid alternative fund with low correlation to stocks and bonds
2. Tactically allocates across 25+ countries in stocks, bonds, and FX
3. Combines complementary discretionary and systematic macro investment processes

CALENDAR YEAR PERFORMANCE (%)

	2021	2022	2023	2024	2025
Share Class	0.64	6.29	3.19	11.81	6.66
Benchmark	0.05	1.47	5.02	5.25	4.18
Morningstar Category Avg.	3.86	0.01	2.62	6.55	7.44

ANNUALIZED PERFORMANCE (%)

	1y	3y	5y	10y
Share Class	9.63	8.87	6.62	5.50
Benchmark	4.00	4.74	3.34	2.26
Morningstar Category Avg.	10.69	5.95	4.79	4.65

Performance data shown represents past performance which is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. Refer to blackrock.com for current month-end performance. Class K shares have limited availability. The performance information for periods prior to the launch date of the share class shows the performance of the Fund's Investor A Shares. The performance of this share class would be substantially similar to Investor A Shares because this share class and Investor A Shares invest in the same portfolio of securities and performance would only differ to the extent that this share class and Investor A Shares have different expenses. Please see the fund prospectus for more details.

The Fund's information between May 15, 2012 and January 28, 2016 is the information for the Fund when it followed different investment strategies to invest a significant portion of its assets in other investment companies and directly in securities.

MORNINGSTAR RANKINGS

	1y	3y	5y	10y
Morningstar Ranking	12/40	7/36	4/36	-
Quartile Rank	2	1	1	-

Rankings based on total return excluding sales charges, independently calculated and not combined to create an overall ranking. For periods not shown, Morningstar does not provide rankings based on synthetic performance.

RATINGS

Morningstar has awarded the Fund a BRONZE medal (Effective 05/06/2025).†

Analyst-Driven % : 100.00%

Data Coverage % : 100.00%

Overall Morningstar Rating for Tactical Opportunities Fund, as of 03/31/2026 rated against 36 Macro Trading Funds based on risk adjusted total return.††

GLOSSARY

Alpha (3y): A measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

Effective Duration: Effective Duration measures the sensitivity of the price of a bond with or without embedded options to changes in interest rates, taking into account the likelihood of the bond being called, put and/or sunk prior to its final maturity date while incorporating after-tax impacts on the bond. The options-based duration model used by BlackRock employs certain assumptions and may differ from other fund complexes. Effective Duration is measured at the individual bond level, aggregated to the portfolio level, and adjusted for leverage, hedging transactions and non-bond holdings, including derivatives.

P/E Ratio: The price to earnings ratio is a fundamental measure used to determine if an investment is valued appropriately. Each holdings' P/E is the latest closing price divided by the latest 12 months' earnings per share. Negative earnings are excluded, extraordinary items are excluded, and P/E ratios over 60 are set to 60.

Analyst-Driven %: Analyst Driven % is the analyst input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar.

Fund Sharpe Ratio (3y): A ratio to measure risk-adjusted performance. The Sharpe ratio is calculated by subtracting the risk-free rate - such as that of the 10-year U.S. Treasury bond - from the rate of return for a portfolio and dividing the result by the standard deviation of the portfolio returns.

Beta (3y): Beta measures the funds sensitivity to market movements beta greater than 1 is more volatile than the market beta less than 1 is less volatile than the market.

P/B Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

R-Squared (3y): R-Squared reflects the percentage of a funds movements that are explained by movements in its benchmark, showing the degree of correlation between the fund and benchmark. This figure is helpful in assessing how likely it is that beta is statistically significant.

Data Coverage %: Data Coverage % is available input data for rating calculation at the Pillar level.

Standard Deviation (3y): Standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

Number of Holdings: The number of holdings in the fund excluding cash positions and derivatives such as futures and currency forwards.

IMPORTANT INFORMATION:

Source: BlackRock, unless otherwise noted.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional. The prospectus should be read carefully before investing. Investing involves risks including possible loss of principal.

% of net assets represents the Fund's exposure based on the economic value of securities and is adjusted for futures, options, swaps, and convertible bonds.

*The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to global.morningstar.com/managerdisclosures/. The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

IMPORTANT INFORMATION:

**Tactical Opportunities Fund received a Morningstar Rating of 4 stars for the 3-year period, 5 stars for the 5-year period and 5 stars for the 10-year period, rated against 36, 36 and 25 Macro Trading Funds, respectively. Performance results represent past performance and are no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Morningstar Ratings are for the share classes cited only; other classes may have different ratings.

Key Risks: The fund is actively managed and its characteristics will vary. Stock and bond values fluctuate in price so the value of your investment can go down depending on market conditions. International investing involves special risks including, but not limited to currency fluctuations, illiquidity and volatility. These risks may be heightened for investments in emerging markets. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Asset allocation strategies do not assure profit and do not protect against loss. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. Investing in small- and mid-cap companies may entail greater risk than large-cap companies, due to shorter operating histories, less seasoned management or lower trading volumes.

Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

The ICE BofA Merrill Lynch 3-Month US Treasury Bill Index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.
