Performance:

The fund (Institutional share class) delivered a positive return of 2.2%, outperforming its performance benchmark* by 0.56% in June.

▲ **Contributors:** Covered calls allocation, security selection in U.S. equities, international equity underweight.

▼ **Detractors:** High yield security selection, floating rate loan allocation, allocation to CMBS, underweight duration

Positioning:

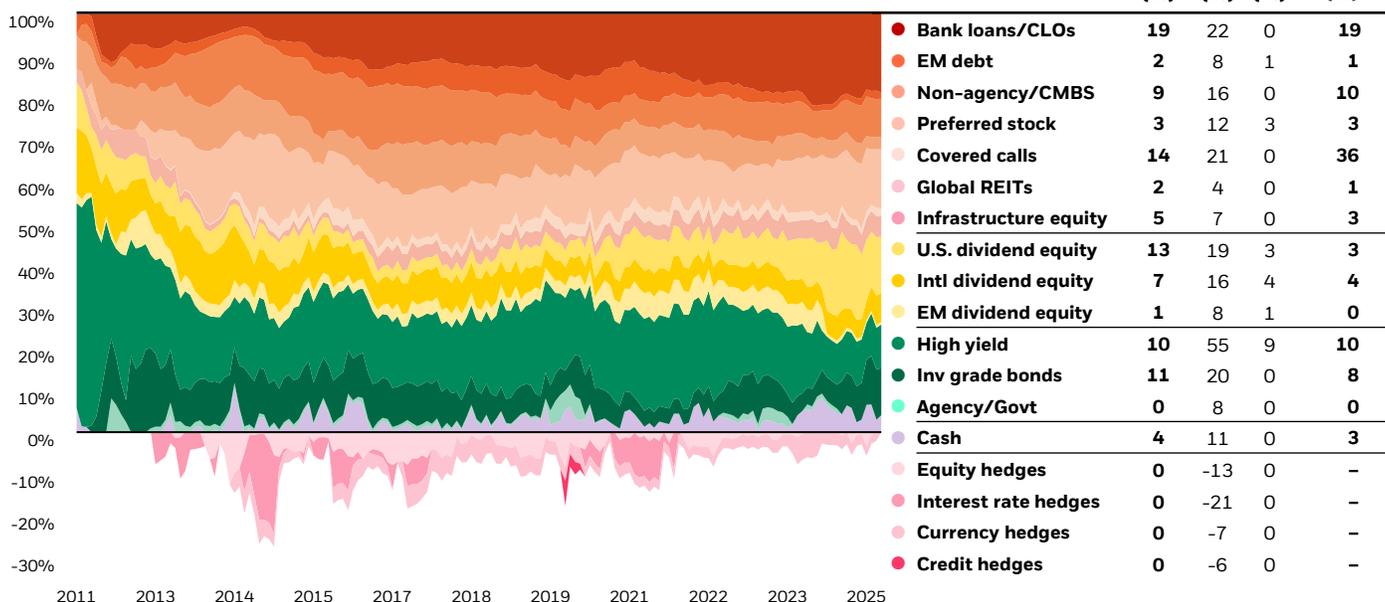

▲ **Increased:** German Bund futures, U.S. equities, Cash

▼ **Decreased:** U.S. Treasury futures, investment grade

*The fund introduced a performance benchmark of 33.34% MSCI World High Yield Dividend Index, 33.33% Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index and 33.33% Bloomberg U.S. Aggregate Bond Index on April 30th, 2025. This benchmark is in addition to the existing risk benchmark comprised of 50% MSCI World Index and 50% Bloomberg U.S. Aggregate Bond Index.

Tactical asset allocation in action

As of June 30, the fund's overall allocation was 54% fixed income, 42% equity and 4% cash.

Values may not equal 100% due to rounding. Asset class exposure shown as a percent of market value. Hedging strategies shown as a percent of notional value and only include short positions.

30-day SEC yield as of 06/30/25	Institutional	Investor A	Investor C	Effective duration
Subsidized	5.80%	5.26%	4.80%	2.41 years
Unsubsidized	5.69%	5.16%	4.69%	

30-day SEC Yield reflects the income earned by an investor in the fund during a 30-day period after deducting the fund's expenses. Unsubsidized SEC Yield represents what a fund's 30-day SEC Yield would have been had no fee waiver or expense reimbursement been in place over the period. **Institutional shares may not be available to all investors. Performance data quoted represents past performance and is no guarantee of future results.** Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. All returns assume reinvestment of dividends and capital gains. Current performance may be lower or higher than that shown. Refer to blackrock.com for most recent month-end performance.

Collateralized Loan Obligations (CLOs) are debt securities issued in different tranches, with varying degrees of risk, and backed by an underlying portfolio consisting primarily of below investment grade corporate loans. The return of principal is not guaranteed, and prices may decline if payments are not made timely or credit strength weakens. CLOs are subject to liquidity risk, interest rate risk, credit risk, call risk and the risk of default of the underlying assets. Additional Tier 1 bonds (AT1s) are contingent convertible bonds that convert into equity or are written down if a bank's capital ratio falls below a pre-defined trigger level.

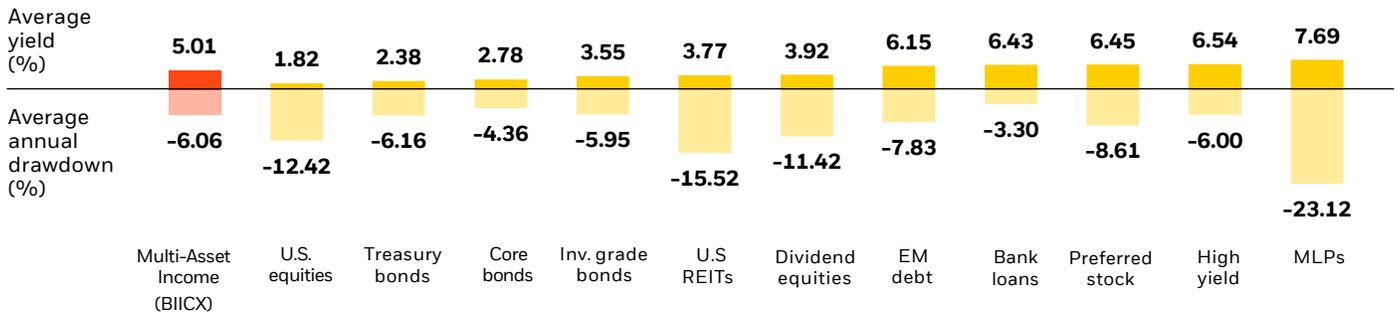

Morningstar has awarded the fund's Institutional share class a Bronze medal (Last rating 06/05/25.)'

July 2025 | Commentary

High yield and less downside

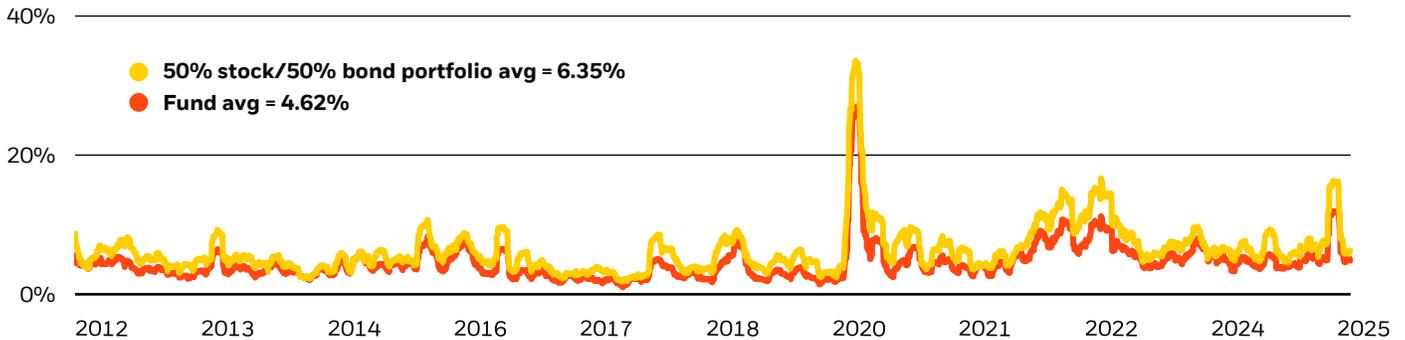

The fund has provided a competitive yield while managing risk to limit losses during periods of market stress.

Source: Morningstar and Bloomberg. Since strategy inception (11/28/11) through 06/30/25. For illustrative purposes only. **Data represents past performance and is no guarantee of future results.** Yield data based on month-end numbers. Fund yield represented by average 30-Day SEC Yield (subsidized). Index yields are shown for illustrative purposes only and do not predict or depict the yield of any BlackRock fund. Yields for the various asset class indices have material differences including investment objectives, liquidity, safety, guarantees of insurance, fluctuation of principal or return and tax features. Fixed income yields represented by yield-to-worst; equity yields by 12-month dividend yield; MLP yield consists primarily of return of capital, which reduces the investor's adjusted cost basis, the composition of which varies based on income, expenses, depreciation and tax elections made by the MLP based on each investor's share of the MLP's income, expenses, gains and losses. Average annual drawdown is the average of the largest declines in value from peak to trough during each of the following calendar years: 2012-2024. **Represented Indices:** Treasury bonds, Bloomberg U.S. 7-10 Year Treasury Bond Index; Core bonds, Bloomberg U.S. Aggregate Bond Index; Inv. grade debt, Bloomberg U.S. Corporate Bond Index; High yield bonds, Bloomberg HY 2% Issuer Capped Index; EM debt, JP Morgan Emerging Market Bond Index Global; Bank loans, S&P Leveraged Loan Index; U.S. equities, S&P 500 Index; Dividend equities, MSCI World High Dividend Yield Index; Preferred stock, S&P U.S. Preferred Stock Index; U.S. REITs, FTSE NAREIT Equity REIT Index; MLPs, Alerian MLP Index.

Lower volatility than a 50% stock/50% bond portfolio

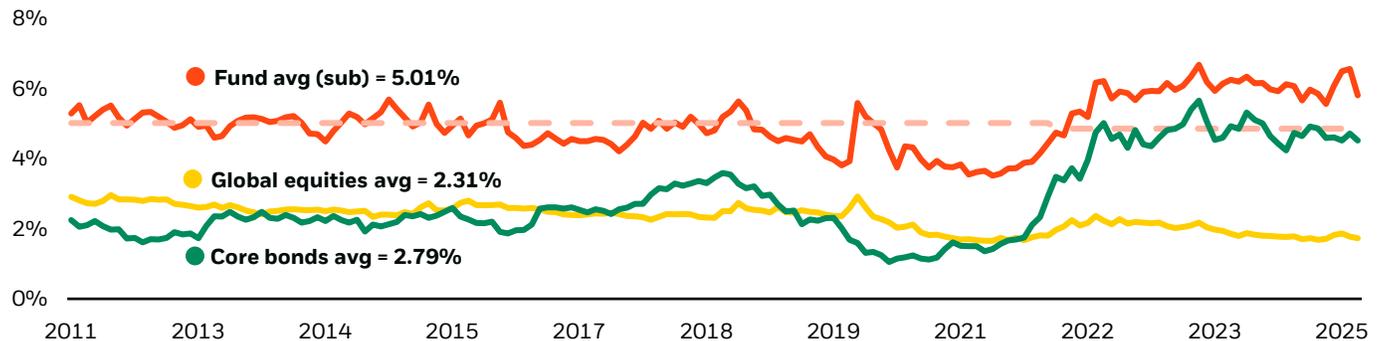

The fund pursues a lower level of risk than a portfolio comprised of 50% stocks and 50% bonds.

Source: Morningstar. Estimated 30-day standard deviation based on daily returns. 50% stock/50% bond portfolio represented by 50% MSCI World Index/50% Bloomberg U.S. Aggregate Bond Index. Standard deviation measures the volatility of returns. Higher deviation represents higher volatility.

Consistent monthly yield

Since inception of the strategy, the fund has provided a consistent and compelling level of monthly income.

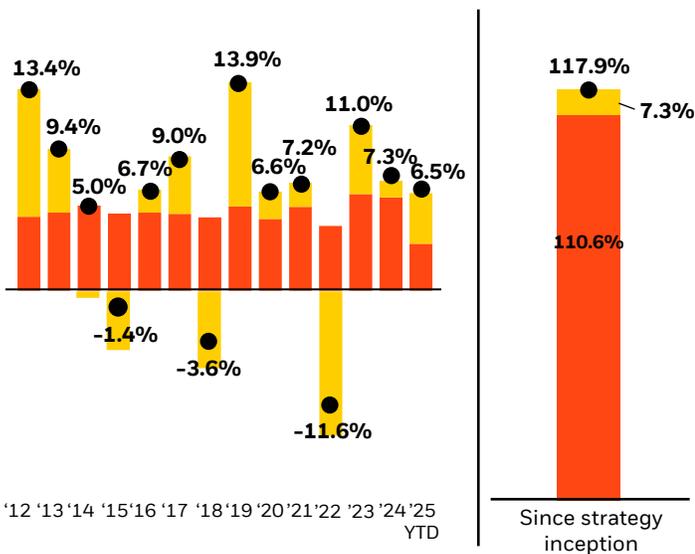

Source: Morningstar and Bloomberg. Fund yield is 30-day SEC yield (subsidized), Institutional share class. Core bonds: Bloomberg U.S. Aggregate Bond Index. Global equities: MSCI World Index.

All data as of 06/30/25.

Historical return composition

The fund has consistently generated a significant portion of its total return from income.

● Income return ● NAV (price) return ● Total return

Source: Bloomberg. Since strategy inception (11/28/11) through 06/30/25.

Performance during market downturns

● BlackRock Multi-Asset Income Fund (Inst)
● MSCI World Index ● Bloomberg U.S. Aggregate Bond Index

Source: Morningstar and Bloomberg. Since strategy inception (11/28/11) through 06/30/25. Average annual drawdown is the average of the largest declines in value from peak to trough during each of the calendar years 2012–2024. Rising rate periods include the average of returns during periods with at least a 40-basis point (0.40%) increase in 10-year Treasury from start date to end date within a 90-day rolling window (not including March 2020 which is represented in equity-sell off).

Our views on the market and portfolio positioning

Alex Shingler, Portfolio Manager

Co-Head Income Team, Multi-Asset Strategies & Solutions

Markets ended June on a strong note, capping the most volatile quarter since early 2020. The S&P 500 advanced 5.2% over the month, bringing its quarterly return to 10.9%, and fully recovering from a nearly 15% drawdown following the April 2nd U.S. tariff announcement. The Nasdaq Composite also posted robust gains, both indices buoyed by renewed optimism around U.S. trade negotiations and increasing conviction that the Federal Reserve (Fed) will begin cutting rates later this year.

June's market moves were broad-based. U.S. high yield credit spreads tightened to 290 basis points, their narrowest since early March, reflecting improved investor sentiment and steady corporate fundamentals. At the same time, the 10-year Treasury yield declined modestly, ending the month at 4.2%, down five basis points. Crude oil prices fell back further in June in a sign that geopolitical tensions are easing in the region. Meanwhile, the U.S. dollar continued to weaken sharply, nearing a three-year low against major currencies supportive for non-U.S. assets and income strategies with global exposure.

Inflation continued to moderate, with headline CPI easing to 2.1% year-over-year. Markets are now pricing 2 to 3 Fed rate cuts by year-end. Additionally, speculation surrounding the next Fed Chair President in 2026 added to the dovish tone.

Despite pronounced volatility earlier in the quarter, underlying fundamentals remained stable. Forward 12-month earnings growth forecasts for the S&P 500 held at

Justin Christofel, Portfolio Manager

Co-Head Income Team, Multi-Asset Strategies & Solutions

around 11%, down only modestly from expectations at the beginning of the year. This backdrop supported our decision to lean back into risk assets as sentiment improved. We maintained our equity overweight position to participate in the strengthening earnings momentum and fading recession risks. We shifted 0.5 years of duration from U.S. Treasury futures to German Bund futures to mitigate rising U.S. fiscal risk, potential foreign divestment, and a relatively tighter U.S. monetary outlook versus the Eurozone.

In June, the portfolio's allocation to covered calls contributed meaningfully to performance by increasing exposure to growth-oriented equities, an area that led the market rally. This segment is less represented in the portfolio's performance benchmark, which includes a 33% allocation to MSCI World High Dividend index, making the covered calls exposure a key differentiator. Security selection within U.S. equities was also strong as the portfolio benefited from pro cyclical positioning. A relative underweight to international equities also helped in a month where U.S. exposures were more additive.

While macro uncertainty remains, particularly around the timing and magnitude of policy easing, the outlook has improved. Growth remains resilient, and the cross-asset backdrop is becoming more supportive for diversified income generation. The portfolio remains well-positioned with a balance of yield, quality, and selective growth exposures designed to navigate evolving market dynamics into the second half of the year.

Data represents past performance and is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. All returns assume reinvestment of dividends and capital gains. Current performance may be lower or higher than that shown. Share classes have different sales charges, fees and other features. Returns with sales charge reflect the deduction of current maximum initial sales charge of 5.25% for Investor A shares. Institutional shares have no front- or back-end load, limited availability and may be purchased at various minimums. Returns with sales charge reflect the deduction of applicable contingent deferred sales charge (CDSC) for Investor C shares. The maximum CDSC of 1% for Investor C shares is reduced to 0% after 1 year. See prospectus for details. Investment returns reflect total fund operating expenses, net of all fees, waivers and/or reimbursements. Expenses, as stated in the fund's most recent prospectus, for Institutional/Inv A shares/Inv C shares of **Multi-Asset Income Fund**: Total, **0.68%/0.92%/1.69%**; Net, Including Investment-Related Expenses (dividend expense, interest expense, acquired fund fees and expenses and certain other fund expenses): **0.57%/0.82%/1.57%**. All share classes have contractual waivers with an end date of 06/30/26 terminable upon 90 days' notice. Index performance is shown for illustrative purposes only. It is not possible to invest directly in an unmanaged index. Net expenses, excluding investment related expenses for Institutional/Inv A shares/Inv C shares: 0.55%/0.80%/1.55%.

Important risks: The fund is actively managed and its characteristics will vary. The fund may invest significantly in BlackRock equity and/or fixed income mutual funds ("underlying funds") and affiliated and unaffiliated ETFs. Stock and bond values fluctuate in price so the value of your investment can go down depending on market conditions. International investing involves special risks including, but not limited to political risks, currency fluctuations, illiquidity and volatility. These risks may be heightened for investments in emerging markets. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities. Asset allocation strategies do not assure profit and do not protect against loss. Non-diversification of investments means that more assets are potentially invested in fewer securities than if investments were diversified, so risk is increased because each investment has a greater effect on performance. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. Negative weightings may result from the use of leverage. Leverage involves the use of various financial instruments or borrowed capital in an attempt to increase investment return. Leverage risks include potential for higher volatility, greater decline of the fund's net asset value and fluctuations of dividends and distributions paid by the fund.

The opinions expressed are those of the fund's portfolio management team as of June 30, 2025, and may change as subsequent conditions vary. Information and opinions are derived from proprietary and nonproprietary sources deemed by BlackRock to be reliable, are not necessarily all-inclusive and are not guaranteed as to accuracy.

1 The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to <http://global.morningstar.com/managerdisclosures>. The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate. **2 Analyst Driven %** is the analyst input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar. Data Coverage % is available input data for rating calculation at the Pillar level. **3 Effective April 30, 2025**, a new performance benchmark has been introduced, comprising 33.34% MSCI World High Dividend, 33.33% Bloomberg US High Yield 2% Issuer Cap, and 33.33% Bloomberg US Aggregate Index. 50% MSCI World / 50% Bloomberg U.S. Aggregate Bond continues to serve as a risk benchmark and remains in the prospectus. MSCI World Index is a market capitalization-weighted index that represents the performance of developed market equities. Bloomberg U.S. Aggregate Bond Index represents the performance of the total U.S. investment grade bond market. MSCI World High Dividend Cap is a component of MSCI World Index and represents large and mid-cap stocks across developed markets with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. Bloomberg US High Yield 2% Issuer Cap is a component of Bloomberg US High Yield Corporate Index and represents fixed-rate, non-investment-grade corporate debt, each issuer capped at 2% of the index.
