Important Tax Information for Open-End Funds

This Booklet is a summary of useful tax information for certain Open-End mutual funds. It will assist you, as an investor, in the preparation of your 2018 Federal and state income tax returns.

We recommend that you consult your tax advisor for assistance with how this information will impact your specific tax situation.

Multi-State Municipal Funds

The information below summarizes the percentage of exempt interest income received by various BlackRock Open-End Funds on a state-by-state basis. These percentages may be useful in completing your state tax return. In addition, the percentage of income that represents a tax preference item (relating to tax-exempt interest income from certain private activity bonds) for Federal Alternative Minimum Tax purposes is included for each Fund. Your portion of the exempt interest income has been included on your Form 1099-DIV. Some states require a minimum percentage of home state bonds to permit the state tax exemption. Shareholders are urged to consult with their tax advisor concerning the application of this information.

^[1] To determine your portion of foreign source qualified dividends, other foreign source income and total foreign source income, multiply the dollar amount of your ordinary dividend by the percentage indicated.

Represents the portion of your qualified dividends that was derived from foreign sources. As a result of the lower tax rates on qualified dividends, these amounts may be subject to certain adjustments before they are taken into account for purposes of computing your foreign tax credit. Please refer to the instructions for Form 1116 or consult your tax advisor for additional information.
