(1) To determine your portion of foreign source qualified dividends, other foreign source income and total foreign source income, multiply the dollar amount of your ordinary dividend by the percentage indicated.

(2) Represents the portion of your qualified dividends that was derived from foreign sources. As a result of the lower tax rates on qualified dividends, these amounts may be subject to certain adjustments before they are taken into account for purposes of computing your foreign tax credit. Please refer to the instructions for Form 1116 or consult your tax advisor for additional information.
