This interim report and unaudited financial statements (the “Report and Financial Statements”) may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Report and Financial Statements. To the extent that there is any inconsistency between the English language Report and Financial Statements and the Report and Financial Statements in another language, the English language Report and Financial Statements will prevail, except to the extent (and only to the extent) that it is required by law of any jurisdiction where the shares are sold, that in an action based upon disclosure in a Report and Financial Statements in a language other than English, the language of the Report and Financial Statements on which such action is based shall prevail. Any disputes as to the terms of the Report and Financial Statements, regardless of the language of the Report and Financial Statements, shall be governed by and construed in accordance with the laws of Ireland.

The Entity is duly registered with the Comisión Nacional del Mercado de Valores in Spain under number 806.

GENERAL INFORMATION (continued)

Money Market Funds ("MMF") are not a guaranteed investment vehicle. An investment in MMF is different from an investment in deposits; the principal invested in an MMF is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. Further information about the funds, including the type of MMF that the fund is classified as under the Money Market Funds Regulation ("MMFR"), the methods used by the MMF to value the assets of the MMF and calculate the Net Asset Value ("NAV"), are available in the prospectus. The credit ratings were solicited and financed by BlackRock.

iSHARES III PLC

BACKGROUND

iShares III public limited company (the “Entity”) is an open-ended investment company with variable capital. The Entity was incorporated in Ireland on 22 January 2008 with limited liability and segregated liability between its funds and is organised under the laws of Ireland. The Entity is regulated by the Central Bank of Ireland (“CBI”) as a public limited company pursuant to the Companies Act 2014 (as amended) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”).

The Entity is structured as an umbrella fund and comprises separate funds (“Fund”) of the Entity. The shares of each Fund may be grouped into different classes of shares (each a “share class”). Each Fund will represent a separate portfolio of assets and may consist of one or more share classes. Each share class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of shares will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus.

While assets and liabilities that are specific to a share class within a Fund would be attributable to (and should be borne by) only that share class, there is no segregation of liabilities between share classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a share class may bring a claim against the assets of the Fund notionally allocated to other share classes.

The term “Fund” or “Financial Product” shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term “BlackRock” and “Investment Manager” are used to represent BlackRock Advisors (UK) Limited as appropriate. All references to “redeemable shares” shall be deemed to mean redeemable participating shares when Fund shares are classified as financial liabilities. The term “Directors” means the directors of the Entity.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity’s prospectus.

Fund details
The Entity had 72 Funds in operation as at 31 December 2025.

The following Funds terminated operations in a prior year and are pending revocation by the CBI. Financial statements continue to be prepared for iShares Developed World ex-UK UCITS ETF, as the Fund still holds financial assets balances at the balance sheet date. No unaudited financial statements have been prepared for the other terminated Funds, as no financial assets are held by such Funds and final termination audited financial statements have been prepared in a prior year.

- iShares EURO STOXX 50 UCITS ETF (Acc)
- iShares J.P. Morgan € EM Bond UCITS ETF

These Funds are Exchange Traded Funds ("ETFs"), which provide the flexibility of a share with the diversification of a Fund. They can be bought and sold like any other share listed on a stock exchange, but provide instant exposure to many companies or various financial instruments relevant to the Fund and its benchmark index.

Changes to the Entity during the financial period
On 21 July 2025, the Manager’s address was changed from 1st Floor, 2 Ballsbridge Park, Ballsbridge, Dublin 4, D04 YW83, Ireland to 3rd Floor, Glencar House, 20 Merrion Road, Dublin 4, D04 T9F3, Ireland.

On 14 August 2025, iShares Global Govt Bond Climate UCITS ETF ceased operations.

[1] No performance benchmark is calculated for this Fund.
[2] The benchmark index included in the table above is for reference only. Please refer to the prospectus for more detail.
[3] The Fund launched on 3 December 2025.
[4] The Fund launched on 21 August 2025.
[5] The Fund ceased operations on 14 August 2025.
[6] The Fund launched on 8 September 2025.

Further information on the index investment strategies used is detailed below:

- For physically replicating funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights represented in the benchmark index over a defined period of time.
- For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other costs.

Performance summary and tracking error

The following table compares the realised Fund performance against the relevant benchmark index for the 6 month period ended 31 December 2025. It also discloses the anticipated tracking error of the Funds (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Funds as at 31 December 2025.

Further information on these performance measures and calculation methodologies used is detailed below:

- The Fund's returns disclosed are the performance returns for the primary share class for each Fund, net of fees and expenses charged directly within the relevant share class, which has been selected as a representative share class. The primary share class represents the class of share invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary share class, unless otherwise stated. The

INVESTMENT MANAGER'S REPORT (continued)

Performance summary and tracking error (continued)

return of the primary share class disclosed may differ to the aggregate Fund performance for all share classes as reported in the financial statements primarily due to the impact of foreign currency translation and share class specific expenses. Performance returns for any other share class can be made available on request.

- For Funds that commenced trading and/or fully redeemed during the financial period, returns are shown from the date the Fund commenced trading and/or to the date the Fund fully redeemed, and the total expense ratio ("TER") is the effective TER from the date the Fund commenced trading and/or to the date the Fund fully redeemed.
- The Fund returns are based on the net asset value ("NAV") calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Returns less than 0.005% are rounded down to zero. Where, due to a public holiday or market closure, a date relevant to determination of the fund returns would not be a dealing day (such that a NAV would not otherwise be calculated on that day), a NAV may nevertheless be determined and calculated in accordance with the prospectus for the purposes of these disclosures. Additionally, due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per share as recorded in the financial statements and the NAV per share calculated in accordance with the prospectus.
- Each Fund's TER is accrued on a daily basis throughout the financial period, which can impact the measurement of a tracking difference in a positive or negative manner depending on the performance in the market and the TER rate applied. The impact on performance measurement depends on the timing of the market performance relative to the Fund's performance period. It can exceed the headline TER in a positive market and be lower than the TER in a negative market. The TER expresses the sum of all fees, operating costs and expenses, with the exception of direct trading costs, charged to each Fund's assets as a percentage of the average Fund assets based on a twelve-month period ended 31 December 2025.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

Net income difference and tax may also impact tracking error due to withholding tax suffered by the Fund on any income received from its investments. The level and quantum of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the Fund with various tax authorities, any benefits obtained by the Fund under a tax treaty or any securities lending activities carried out by the Fund. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

Global economic overview

Global equities, as represented by the MSCI All Country World Index, returned 11.17% (in USD terms) during the six months ended 31 December 2025. Equities made significant gains amid declining inflation (the rate of increase in the prices of goods and services), easing monetary policy from the world's largest central banks and strong corporate performance, especially in the technology sector. However, investor sentiment was increasingly affected by geopolitical tensions, including conflict in Europe and the Middle East, and the continuation of protectionist trade policies in the US that raised the prospect of disruption to the global economy.

Although economic growth in the US recovered from a disappointing start to 2025, with figures for the third quarter of 2025 showing stronger growth than had been expected. In Japan, however, gross domestic product ("GDP") contracted in the third quarter of 2025, while growth in the UK and Eurozone economies slowed as the year progressed.

Most emerging markets continued to grow, although geopolitical conflicts and US trade policy created economic challenges. Having grown more quickly than expected in the first six months of 2025, China's GDP slowed in the third quarter of 2025. Meanwhile, India's GDP rose strongly over the first nine months of 2025.

The US Federal Reserve ("the Fed") resumed its programme of interest rate cuts in the second half of 2025 as inflationary pressures eased and signs of weakness in the labour market emerged. The Bank of England ("BoE") continued to cut interest rates over the six months but officials at the European Central Bank ("ECB") left rates unchanged as inflation in the Eurozone remained near the official 2% target. The Bank of Japan ("BoJ") cut rates for the second time in December 2025 in response to elevated domestic inflation.

The performance of global equity markets was positive but somewhat volatile over the period. Following sharp declines in spring 2025 due to concerns that tariffs introduced by the US government could lead to higher inflation and lower growth, markets recovered on signs that the Trump administration was willing to enter into trade negotiations. Positive corporate performance, particularly among firms involved in artificial intelligence and cloud computing, continued, drove broad increases in share prices.

Equity markets in China continued to rise in the wake of new stimulus measures, and the Japanese market climbed as investors reacted positively to the appointment of a new prime minister. Performance among European stocks was largely positive as investors welcomed the news that European governments planned to significantly increase infrastructure and defence spending.

Globally, investments that factor in companies' environmental, social and governance ("ESG") characteristics faced regulatory concerns and shifting investor sentiment. ESG funds experienced significant outflows in third quarter of 2025.

US government bond yields (which move inversely to bond prices) ended the six-month period lower following the Fed's rate cuts.

Yields on UK gilts had rose at the start of 2025 due to concerns about higher levels of government borrowing but fell back on hopes of further interest rate reductions. Meanwhile, European government bond yields ticked higher on fears the ECB could raise rates in 2026, while Japanese government bond yields rose in response to December's interest rate increase. Global corporate bond performance was broadly positive, continued resilience in the global economy alleviated credit concerns.

In commodities markets, Brent crude oil prices declined over the period due to concerns about oversupply. Gold prices rose to record highs amid geopolitical tensions and signs that American trade and foreign policy could lead to prolonged turbulence in equity and bond markets. Copper prices experienced significant volatility during the period. Prices initially climbed as traders built positions ahead of the anticipated tariff announcements, but this momentum reversed sharply in late July 2025 after reports confirmed that copper would be excluded from upcoming US import levies.

In foreign exchange markets, the US dollar's performance relative to other major global currencies was largely positive. It rose against the euro, sterling and the Japanese yen, but fell against the Chinese yuan.

Fund performance review and activity

iShares $ Corp Bond Enhanced Active UCITS ETF
Over the six-month period to 31 December 2025, the Fund's return was 3.54% and the active return was 0.08%, outperforming its performance measure which returned 3.46% (active return is the difference between the Fund's return and the performance measure).

The second half of 2025 opened with a risk-on tone as improved US policy visibility and trade clarity supported risk assets and tightened credit spreads, despite ongoing rate volatility. Sentiment later turned more mixed on softer data, political uncertainty, and questions around policy credibility, before stabilising as expectations for Fed easing increased. Toward period-end, central bank actions reinforced a varied backdrop, with credit spreads generally tightening while developed-market government bond yields drifted higher amid uneven growth and inflation signals.

With regards to the sectors specifically, the Fund's positioning within the industrial and financial institutions sectors generated alpha over the financial period. Within utilities sector, profit and loss from positioning was relatively flat.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return:

Largest contributors		Largest detractors	
Sector	**Effect on Fund return**	**Sector**	**Effect on Fund return**
Communications ø	0.11%	Electric ø	(0.01%)
Basic industry ø	0.06%	Finance companies#	(0.01%)
Banking ø	0.04%		
Consumer non-cyclical ø	0.03%		
Consumer cyclical #	0.03%		

#Overweight position - held more exposure than the performance measure.
øUnderweight position - held less exposure than the performance measure.

Within industrials, the main alpha contributors were positions in select communication subsectors, such as media and entertainment, wireless, and cable & satellite. Overweight exposure to certain metals and mining names within basic industry, as well as select retail names within consumer cyclicals also generated alpha. These gains were partly offset by underweight exposure to selected automotive producers within consumer cyclicals. Within financial institutions, underweighting selected banking names contributed to performance.

iShares $ High Yield Corp Bond Enhanced Active UCITS ETF
Since inception up to 31 December 2025, the Fund's return was 0.68% and the active return was 0.16%, outperforming its performance measure which returned 0.52% (active return is the difference between the Fund's return and the performance measure).

In December 2025, global bond market sentiment was mixed, with credit spreads tightening while developed-market government bond yields generally moved higher. In the US, inflation surprised to the downside and labor-market conditions softened, with unemployment rising to 4.6% and payroll data affected by federal job losses. The Fed cut rates by 25 basis points to 3.50–3.75% and announced $40 billion in reserve-management purchases for the following month. In Europe, inflation eased to 2.1% versus 2.2% expected, and the ECB held rates at 2%, maintaining a mildly hawkish tone despite softer activity indicators.

The Fund outperformed its performance measure over the review period, primarily driven by positioning within the industrials sector. Positioning within the utilities sector also added value, while the profit and loss from the financial institutions was relatively flat.

#Overweight position - held more exposure than the performance measure.

Within industrials, alpha generation was mainly driven by overweight positions in select gaming companies within consumer cyclicals sector. Overweight positioning in selected wireline communication names and in selected metals and mining names within basic industry also generated alpha. However, these gains were partly offset by overweight positions in certain media and entertainment communication names. Within utilities sector, overweighting certain electric issuers also generated alpha.

Over the six-month period to 31 December 2025, European short term markets were characterised by a policy pause following the ECB's June 2025 rate cut. The ECB held the deposit facility rate at 2% at its July, September, October, and December 2025 meetings, reiterating a data dependent, meeting by meeting approach amid ongoing uncertainty related to trade disputes and geopolitical tensions.

Inflation remained close to target across the period, Euro-area annual harmonised index of consumer prices inflation was 2% in June 2025 and was again estimated at 2% in December 2025, following a modest uptick in late 2025.

Growth stayed positive but moderate, with Euro-area gross domestic product rising by 0.3% quarter over quarter in the third quarter of 2025, and survey data pointing to continued expansion into the fourth quarter, led by services.

With policy rates on hold, the Euro short-term rate remained broadly stable at the period-end, around 1.92%.

The ECB kept the deposit facility rate at 2% through the second half of 2025, helping stabilise Euro-area short-term yields. Market expectations continued to indicate a prolonged pause in policy rates. The portfolio maintained a disciplined approach to liquidity and maturity positioning, with the weighted-average maturity actively managed within a 39–51 days range and ending the period at around 46 days. Toward the period-end, longer-dated exposure was reduced in response to a data-dependent policy outlook and seasonal liquidity conditions.

The following table details the significant portfolio weightings at 31 December 2025 and 30 June 2025:

iShares € Corp Bond Enhanced Active UCITS ETF

Over the six-month period to 31 December 2025, the Fund’s return was 1.32% and the active return was 0.11%, outperforming its performance measure which returned 1.21% (active return is the difference between the Fund’s return and the performance measure).

The second half of 2025 opened with a risk-on tone as improved US policy visibility and trade clarity supported risk assets and tightened credit spreads, despite ongoing rate volatility. Sentiment later turned more mixed on softer data, political uncertainty, and questions around policy credibility, before stabilising as expectations for Fed easing increased. Toward period-end, central bank actions reinforced a varied backdrop, with credit spreads generally tightening while developed-market government bond yields drifted higher amid uneven growth and inflation signals.

Across sectors, the Fund generated alpha in both industrials and financial institutions sectors. Performance from the utilities sector was broadly flat over the financial period.

During the six-month period, the following were the largest contributors to and detractors from the Fund’s return:

Largest contributors		Largest detractors	
Sector	**Effect on Fund return**	**Sector**	**Effect on Fund return**
Consumer cyclical#	0.05%	Insurance∅	(0.02%)

#Overweight position - held more exposure than the performance measure.
∅Underweight position - held less exposure than the performance measure.

Within the communications sector, overweighting select media and entertainment names, as well as exposures to automotive producers within consumer cyclicals, contributed to performance. Overweights in selected technology issuers and diversified manufacturers within the capital goods sector also added to alpha. However, overweights in other industrial names partly offset these gains. Within financial institutions, underweights in selected banking names contributed positively to performance.

iShares € Flexible Income Bond Active UCITS ETF

Over the six-month period to 31 December 2025, the Fund’s return was 2.23%.

The Fund generated positive returns as credit markets remained resilient despite geopolitical noise and shifting tariff risks. Central banks maintained an easing bias, supporting risk appetite and tightening spreads across investment grade and high yield. Elevated dispersion across sectors created attractive opportunities for active allocation, allowing the Fund to capture income across diverse sub-sectors.

During the six-month period, the following were the largest contributors to and detractors from the Fund’s return:

Largest contributors		Largest detractors	
Security	**Effect on Fund return**	**Security**	**Effect on Fund return**
Euro high yield credit	0.98%	Duration	(0.57%)
Emerging markets	0.44%		
Euro investment grade credit	0.29%		
Government other	0.19%

Fund performance review and activity (continued)

iShares € Flexible Income Bond Active UCITS ETF (continued)
Our exposure to Euro high yield credit and investment grade credit benefited from tightening spreads and supportive technicals, while emerging markets added positively amid improving risk sentiment and tighter sovereign spreads. CLO exposures also contributed modestly. These gains were partly offset by duration, which detracted as German bonds sold off following February 2025 fiscal expansion shock and in December 2025, as Purchasing Managers' Index numbers came in stronger than expected.

The following table details the significant portfolio weightings as of 31 December 2025 and 30 June 2025:

31 December 2025		30 June 2025	
Security	**Weightings**	**Security**	**Weightings**
UMBS 30 Year TBA	5.18%	United Kingdom government bonds	1.85%

VMED O2 UK Financing	0.89%	Electricite De France SA	0.68%
UK government bonds	0.87%	ING Group	0.68%

In November 2025, the Fund's investment limits were updated. The maximum allocation to asset-backed securities ("ABS") increased from 20% to 35%, and a new limit of 25% was introduced for CLOs, subject to the condition that at least 80% of CLO investments are in AAA rated tranches and the remainder in investment grade tranches. Alternatively, up to 10% of total assets may be invested in CLOs without rating restrictions.

We used the additional headroom to increase AAA-rated European CLO and ABS exposure, allocating 2% to AAA CLOs and a further 2% to high-quality ABS. We also initiated a position in US agency mortgage-backed securities, now at 7%, primarily through TBAs given our already substantial allocation to other securitised assets.

iShares € High Yield Corp Bond Enhanced Active UCITS ETF
Since inception up to 31 December 2025, the Fund's return was 0.25% and the active return was (0.03%), underperforming its performance measure which returned 0.28% (active return is the difference between the Fund's return and the performance measure).

In December 2025, global bond market sentiment was mixed, with credit spreads tightening while developed-market government bond yields generally moved higher. In the US, inflation surprised to the downside and labor-market conditions softened, with unemployment rising to 4.6% and payroll data affected by federal job losses. The Fed cut rates by 25 basis points to 3.50–3.75% and announced $40 billion in reserve-management purchases for the following month. In Europe, inflation eased to 2.1% versus 2.2% expected, and the ECB held rates at 2%, maintaining a mildly hawkish tone despite softer activity indicators.

The Fund's performance was in line with its performance measure over the review period. Within industrials sectors, overall the Fund generated alpha, while the performance contributions from financial institutions and utilities sectors were relatively muted over the month.

#Overweight position - held more exposure than the performance measure.
∅Underweight position - held less exposure than the performance measure.

Within industrials, overweighting selected consumer product issuers within consumer non-cyclicals sector and underweighting selected wireline communication names weighed on performance. However, this was largely offset by overweight positioning in certain consumer cyclical sub-sector, such as consumer cyclical services and automotive producers.

iShares AI Innovation Active UCITS ETF

Over the six-month period to 31 December 2025, the Fund's return was 17.46% and the active return was 6.29%, outperforming its performance measure which returned 11.17% (active return is the difference between the Fund's return and the performance measure).

In the second half of 2025, enthusiasm for AI remained strong. A September rate cut in the US improved sentiment for growth shares, while earnings across large technology and semiconductor firms generally beat expectations and pointed to continued AI-related investment, reinforcing confidence that demand is durable.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return:

Largest contributors		Largest detractors	
Stock	**Effect on Fund return**	**Stock**	**Effect on Fund return**
Tower Semiconductor Ltd#	1.71%	Meta Platforms Inc.#	(1.15%)
Celestica Inc#	1.38%	Apple Inc.∅	(0.87%)

Astera Labs Inc.#	1.09%	Snowflake Inc.#	(0.60%)

#Overweight position - held more exposure than the performance measure.
∅Underweight position - held less exposure than the performance measure.

Tower Semiconductor Ltd. outperformed as quarterly results and revenue guidance improved, supported by stronger demand for power management, sensor, and connectivity chips alongside ongoing capacity expansion. In contrast, Meta Platforms declined as investors reacted to higher AI-related infrastructure spending and a one-time tax charge that reduced reported earnings despite solid revenue growth.

iShares Asia ex Japan Equity Enhanced Active UCITS ETF

Over the six-month period to 31 December 2025, the Fund's return was 15.78% and the active return was 0.27%, outperforming its performance measure which returned 15.51% (active return is the difference between the Fund's return and the performance measure).

The Fund's strong performance was achieved while navigating Asian equity market volatility caused by the repercussions of several global events in the second half of 2025, such as heightened geopolitical and trade uncertainty following renewed US tariff sanctions, particularly between the US and China.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return:

Largest contributors		Largest detractors	
Stock	Effect on Fund return	Stock	Effect on Fund return
Delta Electronics Inc#	0.52%	Taiwan Semiconductor Manufacturing∅	(0.94%)
SK Hynix Inc#	0.48%	Baidu∅	(0.22%)

CMOC Group Ltd#	0.25%	Zijin Mining Group Ltd∅	(0.16%)
King Yuan Electronics Ltd#	0.24%	Delta Electronics Inc∅	(0.11%)

#Overweight position - held more exposure than the performance measure.
∅Underweight position - held less exposure than the performance measure.

An overweight position in Delta Electronics Inc contributed 0.52% to active returns over the financial period, supported by strong performance driven by high demand for AI-related infrastructure. Conversely, an underweight to Taiwan Semiconductor Manufacturing detracted (0.94%) relative to the performance measure, as the stock also performed strongly due to AI-driven demand.

Over the six-month period to 31 December 2025, the iShares Conservative Portfolio UCITS ETF's return was 2.68%.
Over the six-month period to 31 December 2025, the iShares Growth Portfolio UCITS ETF's return was 8.71%.
Over the six-month period to 31 December 2025, the iShares Moderate Portfolio UCITS ETF's return was 5.60%.

In the second half of 2025, markets were shaped by diverging monetary policy paths, political uncertainty and intermittent trade tensions. In the US, signs of labor market softening and moderating inflation led the Fed to resume easing, delivering rate cuts in October and December 2025, which supported risk assets despite ongoing concerns around growth and elevated equity valuations. In contrast, the ECB held rates steady and signaled a more cautious outlook, weighing on European bond markets amid renewed fiscal and political uncertainty. Equity markets proved resilient overall, with episodes of volatility driven by trade rhetoric and sector rotation away from expensive US technology stocks. Emerging markets benefited from easing US–China trade tensions and a softer dollar, while Japan stood out on expectations of reflation following fiscal stimulus and a BoJ rate hike. Fixed income performance diverged across regions, with US treasuries supported by monetary easing, while European sovereigns faced pressure from fiscal concerns. Commodities and precious metals remained supported into year-end, underpinned by geopolitical uncertainty and expectations of softer global financial conditions.

iShares Conservative Portfolio UCITS ETF (continued)

During the reporting period, markets were supported by resilient global growth, easing inflation dynamics and increased confidence around the monetary policy outlook. Our preference for US equities contributed the most to performance, followed by emerging market ("EM") and European equities, supported by strong corporate fundamentals, continued leadership in growth sectors, as well as improving EM macro stability and a softer US dollar backdrop. Within fixed income, our preference for EM local debt was additive, supported by attractive real yields and selective currency appreciation, while treasuries and other sovereign bonds delivered more modest contributions amid a volatile rate environment.

Over the reporting period, the portfolio stayed within its risk band of 3-7% per annum. with an ex-ante standard deviation* of 5.5% as of 31 December 2025.

* Standard deviation is measured as the total sum of risk contributed by rates, credit, foreign currency and other risks. Rate risk is the risk that the portfolio's value will fluctuate due to movements in benchmark government interest rates. Credit risk is the risk that the portfolio's value will fluctuate due to changes in credit spreads of investment grade, high yield and distressed debt over benchmark interest rates. Foreign currency risk is the risk that the portfolio's value will fluctuate due to changes in foreign exchange rates. Another risk is the risk that the portfolio's value will fluctuate due to factors other than rates, credit and foreign currency risks, typically unique or specific to the portfolio.

The following table details the significant portfolio weightings at 31 December 2025 and 30 June 2025:

31 December 2025		30 June 2025	
Sector	**Weightings**	**Sector**	**Weightings**
European government climate bonds	12.31%	EUR Cash	15.34%
US Treasury bonds 7-10 year	10.71%	European government climate bonds	14.40%
US screened equities	8.93%	US Treasury bonds 7-10 year	10.61%
EUR Cash	8.24%	US Treasury bonds 1-3 year	9.80%
US corporate bonds	7.88%	European corporate bonds	8.90%

Despite episodes of volatility, investor sentiment has remained resilient, supported by strong equity performance and constructive systematic indicators. Looking ahead, we expect global growth to re-accelerate in 2026, underpinned by easier fiscal and monetary policy in the US. While equity valuations appear elevated, we believe the macro and policy backdrop remains supportive, allowing us to maintain a cautiously optimistic stance. In this rebalance, we modestly increased overall portfolio risk to align with the new risk band (from 2-5% to 3-7%). We hence added to equities, funded by reductions in cash and government bonds, resulting in a slightly lower duration profile. Regional equity tilts remain unchanged, with a continued preference for US equities, supported by resilient earnings. Within fixed income, we increased exposure to EM local currency debt, funded by developed market rates. With uncertainty around the future policy path easing, we see local currency EM debt as offering attractive carry and diversification, while being less sensitive to potential dollar volatility. We also introduced a 2% allocation to gold, reflecting its diversification benefits and ongoing support from structural central bank demand.

European ESG enhanced equities	10.93%	Emerging markets ESG enhanced equities	8.38%
EM ESG enhanced equities	10.03%	US SRI equities	4.99%

Market sentiment has remained resilient following periods of volatility, supported by strong equity returns and constructive risk signals, including systematic indicators pointing to positive investor sentiment and supportive news flow. We expect global growth to improve into 2026, aided by a more accommodative policy environment, particularly in the US, where fiscal and monetary settings are expected to become more supportive. While valuations are elevated, we do not see a compelling case to materially reduce risk, given the expectation of re-accelerating growth and a favourable policy backdrop. In this rebalance, we remained moderately risk on. Overall, we are overweight US and EM equities, where earnings momentum remains robust, and neutral in Europe. Within fixed income, we remained comfortable with our duration stance, keeping it, untouched, as near term rate cuts appeared largely priced in and uncertainty around the future policy path has eased. We finally added a 2% allocation to gold to enhance diversification and portfolio resilience, funded from high yield corporate bonds, reflecting both its strong performance this year and ongoing support from structural central bank demand.

iShares World Equity Factor Rotation Active UCITS ETF

Over the six-month period to 31 December 2025, the Fund's return was 9.18% and the active return was 1.43%, regrettably underperforming its performance measure which returned 10.61% (active return is the difference between the Fund's return and the performance measure).

Global equities advanced over financial period, supported by the Fed rate cuts, easing trade tensions and resilient earnings. Market leadership shifted from a narrow, growth led rally in the third quarter of 2025 toward broader, more cyclical and value oriented sectors in fourth quarter of 2025, reflecting improving confidence in the global economic outlook.

The Fund underperformed as large overweights to momentum and quality detracted amid sharp factor reversals and weak performance across defensives. This outweighed strong contributions from value, where the Fund was overweight and the strongest performing factor, and modest support from growth. An underweight to size was beneficial as smaller companies lagged the index.

There were no wholesale changes to the portfolio’s sector composition over the period; however, positioning in financials were actively adjusted. The Fund moved to an underweight position during the financial period before rebuilding an overweight by December 2025. Other core overweights and underweights remained broadly stable, reflecting consistent factor driven positioning.

iShares World Equity High Income Active UCITS ETF

Over the six-month period to 31 December 2025, the Fund’s return was 10.61%, performing in-line with its performance measure which also returned 10.61%.

Fund performance review and activity (continued)

iShares World Equity High Income Active UCITS ETF (continued)

The Fund recorded a beta of 0.90 and returned a trailing 12-month yield of 10%. This strong performance was achieved while navigating global equity market volatility caused by the repercussion of several events in the second half of 2025, such as heightened geopolitical uncertainty following renewed US tariff sanctions.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return:

Largest contributors		Largest detractors	
Stock	**Effect on Fund return**	**Stock**	**Effect on Fund return**
ABB[#]	0.15%	HSBC Holdings Plc[∅]	(0.09%)
Morgan Stanley[#]	0.14%	Roche Holding[∅]	(0.09%)
Wheaton Precious Metals[#]	0.13%	Verisk Analytics Inc[#]	(0.08%)
LAM Research Corp[#]	0.13%	Applovin Corp[∅]	(0.07%)
Borgwarner Inc[#]	0.11%	Intuit Inc[#]	(0.07%)

[#]Overweight position - held more exposure than the performance measure.
[∅]Underweight position - held less exposure than the performance measure.

An overweight to ABB contributed 0.15% in active returns over the financial period. This was, partially, driven by the strong performance of the security coming off the back of AI-driven demand for data-center expansions. An underweight to HSBC Holdings Plc contributed (0.09%) in active underperformance relative to the performance measure, driven by the strong performance of European financials throughout 2025.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the performance measure) and underweight (held less than the performance measure), as at 31 December 2025 and 30 June 2025:

1. General information

The Entity is an open-ended investment company domiciled and incorporated under the laws of Ireland as a public limited company. The Entity is authorised by the CBI and is governed by the provisions of the UCITS Regulations with its registered office at J.P. Morgan, 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

2. Material accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements.

All amounts have been rounded to the nearest thousand, unless otherwise indicated. Amounts which are less than CCY 500 have been rounded down to zero.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

3.2 Counterparty credit risk

3.2.1 FDIs

3.2.1.1 OTC FDIs

The risk in relation to OTC FDIs arises from the failure of the counterparty to perform according to the terms of the contract as these FDI transactions are traded bilaterally except those cleared centrally.

All OTC FDI transactions are entered into by each Fund under an ISDA Master Agreement or similar agreement. An ISDA Master Agreement is a bilateral agreement between each Fund and a counterparty that governs OTC FDI transactions entered into by the parties.

The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore, any collateral disclosures provided are in respect of all OTC FDI transactions entered into by each Fund under the ISDA Master Agreement. All cash collateral received/posted by each Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

Each Fund is the legal owner of inbound collateral and can sell the assets and withhold the cash in the case of default. If the counterparty fulfils its obligations in relation to the investment, each Fund will return an equal amount of cash to the counterparty on maturity or sale of the investment. When each Fund return securities collateral to the counterparty, it must be of the same type, nominal value, description and amount as the securities that were transferred to each Fund. Trading in OTC FDIs which have not been collateralised give rise to counterparty exposure.

Each Fund's maximum exposure to counterparty credit risk from holding forward currency contracts will be equal to the notional amount of the currency contract and any net unrealised gains as disclosed in the relevant Fund's schedule of investments.

NOTES TO THE FINANCIAL STATEMENTS (continued)

3. Financial risks (continued)

3.2 Counterparty credit risk (continued)
3.2.1 FDIs (continued)
3.2.1.1 OTC FDIs (continued)

With the exception of non-deliverable forward currency contracts held on iShares Core Global Aggregate Bond UCITS ETF and iShares Global Aggregate Bond ESG SRI UCITS ETF, forward currency contracts do not require variation margins and the counterparty credit risk is monitored through the BlackRock RQACounterparty & Concentration Risk Team who monitor the creditworthiness of the counterparty. Margin is paid or received on non-deliverable forward currency contracts to cover any exposure by the counterparty or each Fund to each other. The margin cash account on the condensed balance sheets consists of margin receivable from each Fund's clearing brokers and the forward currency contracts counterparty.

Each Fund has the right to reinvest cash collateral received. Cash collateral pledged by each Fund is separately identified on the balance sheets as cash collateral and is not included as a component of cash and cash equivalents. Inbound cash collateral received by each Fund is reflected on the balance sheets as cash collateral payable. Each Fund is also exposed to counterparty risk of rehypothecation of pledged collateral. The value of inbound cash collateral and cash collateral pledged is reflected on the balance sheets of each Fund.

The following tables detail the total number of OTC FDI counterparties each Fund is exposed to, the lowest long-term credit rating of any one counterparty (or its ultimate parent, if it is unrated), the maximum exposure to any one counterparty (which is calculated on a net basis) and the related total cash collateral received to this individual counterparty exposure, where applicable:

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the Entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument’s valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant Entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

Specific valuation techniques used to value financial instruments classified as level 2 and/or level 3 include:

(i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;

(ii) for investments which are a share of participation in an investee collective investment scheme ("CIS") and investments in ETFs where the Fund typically trades the units held at the latest NAV for that ETF, are valued at the unaudited NAV, and where available the independently audited NAV, on the valuation date of such unit of participation as calculated by the administrator of the investee CIS and ETF and in accordance with the requirements of the scheme of which the relevant investment is a share of participation. The unaudited NAV of the underlying investee CIS and ETF is reflected gross of any redemption costs which may potentially arise upon redemption from the underlying CIS and ETF. The unaudited NAV of the underlying investee CIS and ETF may be subject to adjustments upon issuance of their respective independently audited financial statements and such adjustments may be material to the Fund’s financial statements;

4. Fair value hierarchy (continued)

(iii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;

(iv) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;

(v) for total return swaps, the value of the estimated cash flows based on the market value of the underlying reference assets or index at the condensed balance sheet date; and

(vi) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the condensed balance sheet date.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were either not market observable or adjusted for counterparty or own credit risk, or certain CISs which have gates or redemption restrictions imposed or that can't be redeemed within 90 days, are included in level 3.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

5. Operating expenses

The Entity employs an “all in one” fee structure for its Funds, with each Fund paying all of its fees, operating costs and expenses (and its due proportion of any costs and expenses allocated to it) as a single flat fee (the TER). Where a Fund has multiple share classes, any fees, operating costs and expenses which are attributable to a particular share class (rather than the entire Fund) will be deducted from the assets notionally allocated by each Fund to that share class. The TER is calculated in accordance with the CESR/10-674 Committee of European Securities Regulators ("CESR") (European Securities and Markets Authority’s ("ESMA") precursor) guidelines on the methodology for calculation of the ongoing charges figure in the KIID or the product page of the website at https://www.ishares.com.

The Manager is responsible for discharging all operational expenses, including but not limited to fees and expenses of the Directors, Investment Manager, Depositary, Administrator, Transfer Agent and Registrar from the amounts received by the Manager from the TER. Such operational expenses include regulatory and audit fees but exclude transaction costs and extraordinary legal costs. In the event a Fund’s costs and expenses in connection with the operation of the Fund exceed the stated TER, the Manager will discharge an excess amount out of its own assets.

Management fees (inclusive of investment management fees):

The Manager is entitled to an annual fee at rates not exceeding those set out on the following table. These rates are the maximum fee rates as at 31 December 2025:

[1] Where a Fund has multiple share classes, any fees, operating costs and expenses which are attributable to a particular share class (rather than the entire Fund) will be deducted from the assets notionally allocated by the Fund to that share class.
[2] This charge can be up to 1.00%. Any increase in this charge will be subject to prior shareholder approval.
[3] As this Fund/share class launched during the financial period, the fees, operating costs and expenses used to calculate the TER have been annualised.

Whilst it is anticipated that the TER borne by a Fund or share class shall not exceed the amounts set out above during the life of each Fund or share class (respectively) such amounts may need to be increased. Any such increase will be subject to the prior shareholder approval of the relevant Fund or share class evidenced either by a majority vote at a meeting of shareholders or by a written resolution of all of the shareholders.

As disclosed, no commissions, discounts, brokerages or other special terms have been granted or are payable by the Entity in connection with the issue or sale of any capital of the Entity.

6. Distributions to redeemable shareholders

The Entity may declare and pay dividends on any distributing class of shares in the Entity. In accordance with the prospectus, any dividend which has remained unclaimed for twelve years from the date of its declaration shall be forfeited and cease to remain owing by the Entity to investors and become the property of the relevant Fund.

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

b) Certain exempted Irish tax resident shareholders who have provided the Entity with the necessary signed annual declarations; and

c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as CREST) will not constitute a chargeable event. It is the current intention of the Directors that all the shares in the Entity will be held in CREST or another recognised clearing system.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Entity or its shareholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

The Organisation for Economic Co-operation and Development (“OECD”) released Pillar Two Model Rules, which contemplate a global 15% minimum tax rate. The OECD continues to release additional guidance, including administrative guidance on interpretation and application of Pillar Two, and many countries are passing and updating legislation as well as local guidance to comply with Pillar Two.

Based on the available legislation, the Entity concluded there was no material impact on income taxes with respect to Pillar Two for the financial period ended 31 December 2025. The Entity will continue to evaluate the potential future impacts of Pillar Two and will continue to review and monitor the issuance of additional guidance.

8. Share capital

Authorised

The authorised share capital of the Entity is 2 subscriber shares of a par value of EUR1.00 each and 500,000,000,000 participating shares of no par value.

Subscriber shares

2 subscriber shares are currently in issue and are held by the Manager or by nominees of the Manager at 31 December 2025 and 30 June 2025. They do not form part of the NAV of the Entity. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors this disclosure reflects the nature of the Entity’s investment business.

Voting rights

The holders of the subscriber shares and redeemable shares shall, on a poll, be entitled to one vote per share.

9. Net asset value attributable to redeemable shareholders

The below NAV per shares as at 31 December 2025 have been prepared for financial statements purposes in accordance with FRS 102.

Significant investors

As at 31 December 2025 and 30 June 2025, each Fund has a single shareholder which is a nominee of the common depository for the International Central Securities Depositaries (“ICSDs”) in which the shares of the Funds are cleared and settled. However, the beneficial ownership of such shares, and the voting rights in relation to such shares, are passed from the common depositary to the ICSDs and onwards to the participants of the ICSDs.
